

A transformative approach
to weight loss and health

Allurion
PROGRAM

Allurion

PROGRAM

Treat more patients and grow your practice with a new weight-loss device

- ▶ Placed during a brief 15-minute visit and passes naturally after approximately 16 weeks.
- ▶ Allurion patients on average lose 10-15% of their Total Body Weight Loss (TBWL).^{1,2}
- ▶ Up to 95% of weight loss may be sustained one year after the balloon has passed.³
- ▶ Provider Virtual Care Suite for patient management.
- ▶ Patient support tools to reach weight-loss goals.

**Allurion is now the
world's bestselling
gastric balloon
programme.
Be part of our
success story.**

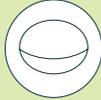

1. Ienca et al. *Obes Surg.* 2020, 2. Vantanasiri et al. *Obes Surg.* 2020, 3. Ienca, presented at TOS Obesity Week, 2020.
*In rare cases, the Allurion Balloon may require endoscopic or surgical intervention for removal. Allurion is a trademark of Allurion Technologies in countries around the world.

More than 50,000 patients in over 40 countries have seen transformative results.

Is clinically proven in multiple studies, demonstrating safety and effectiveness.²

Key insights for your business

**Market research performed in eight countries
with 9,800 consumers showed:**

- ▶ Patients' needs and expectations remain unmet with existing weight-loss solutions.
- ▶ Endoscopy, anaesthesia, and surgery are major barriers to treatment for overweight and obese patients.

3x

**more patients would consider the
Allurion Balloon than those who
would consider bariatric surgery.**

**The Allurion Programme is addressing the
unmet needs and expectations of your patients.**

THE ALLURION BALLOON

The world's first and only weight-loss device that requires no surgery, endoscopy, or anaesthesia for either placement or removal.*

The Allurion Balloon is swallowed in a doctor's office.

The Allurion Balloon is filled with 550ml of liquid in the stomach.

At approximately week 16, the Allurion Balloon self-empties and passes naturally.*

*In rare cases, the Allurion Balloon may be vomited at end of residence or require endoscopic or surgical intervention for removal.

The Allurion Balloon has demonstrated safety and efficacy¹

01

SIMPLE PROCEDURE

The Allurion Balloon is swallowed during a brief 15-minute visit and passes naturally after approximately 16 weeks.¹

02

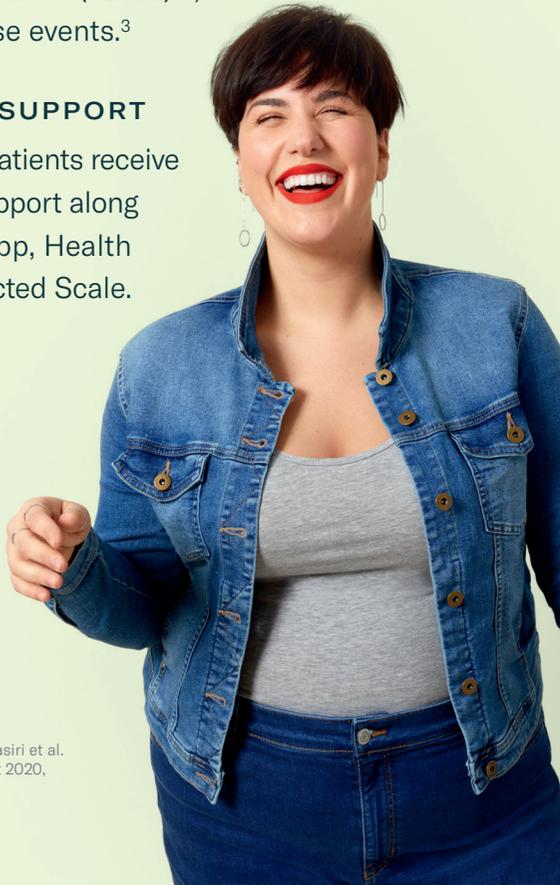

EFFECTIVE RESULTS

On average Allurion patients lose 10-15% of their Total Body Weight Loss (TBWL)^{1,2}, with <2% reporting adverse events.³

03
